THE COTTON CROP. crop has interest for our readers. We therefore summarize from the National gas, Alabama, Mississippi and Texas. It says that in addition to the fact of an decreased area devoted to cotton this sippl valley, as well as the southern Atlantic and gulf States, has operated most disadvantageously to the germination and growth of the seed after planting. The majority of the reports received thus far speak of the wel and cool weather as having been against a says that with the targe majority of our favorable growth, even when overflow merchants we shared the recent indigfrom high water was not experienced. THE SCHOOL PURB AGAIN.

It is seldom that one meets so much misrepresentation in so short a space as Chronicle. The school fund, fo the amount of over six bundred thousand dellars in gold, was returned to the State voluntarily by the gentlemen in whose charge it remained at the close of the war; and, if invested, as it might have Doors, Sash, Blinds, Mantels, Mouldbeen at the time, would have netted quite one million dollars. But the Rudical legislature, which was so lavish with our State bonds, having only the individual interests of the members at heart, expended some, and stole the most of it, as was proven upon investigation. The Chronicle's people are justly chargeable with the loss of one million dollars of the school fund, and the less it has to say about it, the better.

THE ring-masters of the senate went too far when they passed the civil rights bill. Neither the press har people of the north will stand it. We yesterday quoted from the Cincinnati Gazett a sentence or two of severest censure of that obnoxious measure, and now we quote from the New York Times, the administration organ, which tells the negro and his master that, as a political investment, he is played out.
